PROFILE

Computer Science undergraduate at Conestoga College with hands-on experience in Python problem-solving and foundational C/C++ programming through team-based academic projects. Skilled in modular software design, test-driven development, and translating requirements into working, well-documented code. Brings strong communication, reliability, and teamwork built through customer-facing and business support roles, along with leadership experience organizing and marketing large student tech events. Seeking an IT Internship to apply technical fundamentals and grow in a professional environment.

HIGHLIGHT OF QUALIFICATIONS

- Computer Science undergraduate with hands-on experience across C, C++, and Python through applied team projects
- Practical exposure to Test-Driven Development (TDD) and unit testing using the Microsoft Native Unit Testing Framework
- Experience designing modular program logic, including eligibility/validation systems, dynamic data structures, and file handling
- Collaborative team player experienced with Git/GitHub version control across multi-person development projects
- Proven leadership and marketing experience organizing large-scale student technology events (ConHacks, Build with Gemma)
- Reliable and personable communicator with a strong customer-service and business support background

TECHNICAL SKILLS SUMMARY

Languages: hands-on experience with C, C++, and Python; familiar with fundamental data structures and algorithms

Tools & Platforms: Visual Studio, Git, GitHub, IntelliJ IDEA

Testing Methodologies: Test-Driven Development (TDD), Unit Testing, Input Validation & Error Handling

Other: Documentation, Survey Research, Problem Solving, Teamwork, Communication

EDUCATION

Bachelor of Computer Science

Jan 2026 – Sep 2028 (anticipated)

Conestoga College, Waterloo, ON

- GPA: Term 1 – 3.84 | Term 2 – 3.74
- Program highlights: software development, testing methodologies, software project management, and cybersecurity/privacy awareness

ACADEMIC PROJECTS

Banking Management System (BMS)

2026

Conestoga College — Team Project (C, Test-Driven Development)

- Developed the deposit_amount module and the shared banking.h header used across the team's codebase
- Implemented account-type-specific validation logic for deposits (e.g. Savings minimum, Checking maximum)
- Practiced strict TDD workflow using Microsoft's Native Unit Testing Framework in Visual Studio, targeting 100% code coverage

Amusement Park Ticket Generator

May 2026 – Aug 2026

Conestoga College — 4-Person Team Project (C)

- Designed the Eligibility and Selection modules, validating rides against visitor age, height, and weight requirements
- Built a dynamic ride-selection cart with duplicate prevention, CSV-based ride data loading, and a tiered discount/free-ride system
- Applied structures, pointers, dynamic memory allocation, and file handling across a modular multi-file C codebase

Expense Tracker

Jul 2026

Conestoga College (Python)

- Built a logic-based Python program to record and calculate personal expenses using loops, conditionals, and lists
- Used structured user input handling for real-time data processing and output

RELATED EXPERIENCE

Executive Lead

May 2026 – Present

Google Developer Group @ Conestoga College

- Part of the core organizing and marketing team, driving planning and promotion for flagship events including ConHacks and Build with Gemma
- Coordinated event logistics and cross-team communication to ensure smooth execution from planning to day-of delivery
- Led marketing efforts across social media and campus channels, boosting event visibility and attendee turnout

Growth Hacker

Aug 2026

ConHacks 2026, Conestoga College

- Supported marketing and growth strategy for a large-scale student hackathon, helping drive participant sign-ups and outreach

ADDITIONAL EMPLOYMENT HISTORY

Customer Service Associate

Domino's Pizza

- Arrived reliably for scheduled shifts and consistently followed documented procedures and safety standards
- Resolved customer issues and order discrepancies clearly and professionally under time pressure
- Collaborated closely with team members during high-volume periods, coordinating tasks and status updates

Customer Service Assistant

Family-Owned Business

- Supported daily operations and kept records and work areas organized, helping identify small process improvements
- Assisted customers with purchases and inquiries, building strong interpersonal and communication skills

EXTRA CURRICULAR

- Executive Lead, Google Developer Group @ Conestoga College — May 2026 – Present
- Organizer, Build with Gemma — 2026
- Growth Hacker, ConHacks 2026 — Aug 2026
